CSR policy

The CSR operations of Tokyo Electron (TEL) are initiatives that realize TEL’s Corporate Philosophy. The company pursues sustainable operations from the viewpoints of corporate governance, legal and regulatory compliance, and business ethics while creating new value through its products and services. Based on these efforts, TEL implements CSR activities to help address social issues. The company will continue to pursue CSR activities to build stakeholder trust, improve corporate value and, by doing so, promote the growth of a sustainable and dream-inspiring society.

CSR promotion framework

TEL implements sustainability management which is integrated into the management strategy from a medium- to long-term perspective of corporate value enhancement. The company promotes CSR activities centered on the following three bodies. The CSR Management Council, the highest decision-making body regarding CSR, conducts discussions regarding the policy for the entire Group and important projects. CSR representatives from around the world participate in the CSR Global Committee, which discusses short- to medium-term CSR targets, promotion of global projects, and other matters. Representatives from each division attend the CSR Monthly Meeting, where information is shared regarding CSR activities, and which builds cooperative systems to tackle cross-division themes.
