

TEL's Credo on Environmental Preservation

< TEL's Credo on Environmental Prevention >

The Tokyo Electron Group believes that preserving and continuously improving the global environment is one of the most important objectives for mankind, as well as our business. Based on this credo, we are determined to expand our business by maintaining harmony with the global environment, and thus win the trust of our many customers, shareholders, employees and society in general.

< TEL's Principles on Environmental Preservation include: >

1. Continuous Improvement

TEL recognizes that the products we manufacture affect the environment, and therefore, we, with our customers and suppliers, shall continually strive to minimize the environmental impact of our processes and operations.

2. Knowledge

TEL continually strives to enhance its understanding of the impact that TEL's operations have on the environment, and the responsibility that this entails. In addition, TEL aims to gain a quantitative grasp of environmental factors, and the impacts resulting from our activities and operations.

3. Performance Criteria

As well as strictly observing mandatory environmental laws, treaties and agreements, TEL strives to enhance its own environmental management system and improve global environmental preservation programs by the proactive establishment of its own aggressive environmental performance criteria.

4. Disclosure

TEL shares information about its environmental concepts and principles, as well as the progress of our ongoing contributions toward environmental protection with employees and the general public.

5. Partnership

TEL actively participates in environmental protection activities practiced by our customers, suppliers and local communities.

TEL's Safety and Health Credo

< TEL's Safety and Health Credo >

Safety and health training are required for all employees and board members at TEL. Our profit delivery date requirements, and time limitations must not be met at the sacrifice of human life and the safety of our facilities and equipment.

< TEL's Principles on Safety and Health Preservation include:>

1. Continuous Improvement

TEL is conscious that the factors that affect the safety and health of customers and our employees exist at the stage of manufacturing, transportation, installation, use, maintenance and service of our products, and based on this awareness, we shall continually strive to eliminate factors that impede the safety and health of our products.

2. Knowledge

TEL continually strives to enhance our understanding of safety and health and improve these conditions for all people working in our sites. In addition, TEL aims to gain qualitative and quantitative grasps of safety and health factors on TEL Group activities and operations.

3. Performance Criteria

As well as strictly observing mandatory safety and health laws, treaties and agreements, TEL strives to enhance its own safety and health management system and improve global safety and health programs by the proactive establishment of aggressive safety and health performance criteria.

4. Disclosure

TEL shares information about its safety and health credo, policies and the progress of our safety and health activities with all board members and employees, and publish the general public our progress as the need arises.

5. Partnership

TEL actively participates in safety and health activities practiced by our customers, suppliers and communities.

Editorial Policy

Tokyo Electron (TEL) has published an environmental report every year since FY 2001 to describe our efforts in the issues of the environment, health and safety and our social contribution activities. In addition to those topics, this year our report also covers our social activities. We have prepared this report to be as easy as possible to read and understand so that our readers can get a good grasp of TEL's activities. Our goal in publishing these reports is to expand the scope of communication with everyone affected by or otherwise concerned with TEL. All readers are invited to tell us your opinions and impressions of this report and TEL, so that the editors can more adequately address your concerns in future reports.

In the planning of this report, we have used the Environmental Reporting Guidelines (2003) released by the Japan Environmental Ministry and the 2002 Sustainability Reporting Guidelines of the Global Reporting Initiative (GRI), an organization that provides international sustainability report guidelines.
