Management Policies

The Management Policies contain the management values which Tokyo Electron holds as important in achieving the Corporate Philosophy. They express the manner of thinking that underscores the general rules of management in eight points.

1 Profit is Essential
   The TEL Group aims to contribute to the development of society and industry and enhancement of corporate value while emphasizing the pursuit of profit.

2 Scope of Business
   The TEL Group leads markets by providing high-quality products in leading-edge technology fields with a focus on electronics.

3 Growth Philosophy
   We will tirelessly take on the challenges of technological innovation to achieve continuous growth through business expansion and market creation.

4 Quality and Service
   The TEL Group strives to understand the true needs for achieving customer satisfaction and securing customer trust while continuously improving quality and service.

5 Employees
   Employees are the source of the creation of value, and TEL Group employees perform their work with creativity, a sense of responsibility, and a commitment to teamwork.

6 Organizations
   The TEL Group builds optimal organizations that maximize corporate value where each employee can work to their full potential.

7 Safety, Health and the Environment
   The TEL Group gives the highest consideration to the safety and health of every person connected with our business activities as well as to the global environment.

8 Social Responsibility
   With a full awareness of our corporate social responsibility, we strive to gain the esteem of society and to be a company where employees are proud to work.
