

TOKYO ELECTRON AT A GLANCE

Summary of Business

Semiconductor Production Equipment

Tokyo Electron supplies a wide range of semiconductor production equipment (SPE) and provides outstanding service support to the world's manufacturers of semiconductor devices. Tokyo Electron's products and technologies support high productivity and diverse customer needs and are thus indispensable in the manufacture of increasingly sophisticated semiconductors.

Tokyo Electron develops, manufactures and sells on a global basis coaters/developers, plasma etch systems, thermal processing systems, single wafer deposition systems and surface preparation systems that are essential for wafer processing processes, as well as wafer probers used in testing processes. Many of the Company's products command top global market shares.

FPD Production Equipment

Tokyo Electron supplies flat-panel display (FPD) production equipment that is used to manufacture displays for PCs, LCD TVs and other electronic devices to LCD panel manufacturers along with technical support. Specifically, Tokyo Electron develops, manufactures and sells FPD coater/developers and FPD plasma etch/ash systems. The size of substrates handled by this equipment is increasing by the year along with the growing popularity of large-screen LCD TVs. With its outstanding products and service support, Tokyo Electron is able to respond to customer needs for high quality and lower cost.

Electronic Components

In this segment, Tokyo Electron Device Limited (TED) is developing a new business paradigm consisting of two functions. One is as a distributor of a wide array of sophisticated electronic components from around the world. The other is a "development business," whereby TED provides optimal solutions to customers, from the first stage of planning to design, development and manufacturing, taking advantage of its strong product development and marketing capabilities.

Computer Network

Tokyo Electron delivers business solutions for the broadband era with a wide assortment of superior network-related and other products that cater to the needs of the time. Backed by a worldwide marketing organization that enables the Company to stay abreast of the latest technological developments around the globe, Tokyo Electron provides integrated solutions from product introduction to support.

Net Sales

Besides the aforementioned businesses, the Company recorded sales in the Others business of ¥1,121 million in fiscal 2007, compared with ¥1,249 million in fiscal 2006.

Main Products

Share of Net Sales

- Coater/Developer
- Spin-on Dielectric Coater
- Plasma Etch System
Dielectric Etch System, Silicon Etch System
- Thermal Processing System
- Single Wafer Deposition System
CVD System, Plasma Processing System
- Surface Preparation System
Auto Wet Station, Single Wafer Cleaning System, Pre-clean System, Scrubber System
- Wafer Prober
- Imported Products

Coater/Developer
CLEAN TRACK™ LITHIUS Pro™

Thermal Processing System
TELINDY™

- FPD Coater/Developer
- FPD Plasma Etch/Ash System

FPD Plasma Etch/Ash System
Impressio™

- Semiconductor Products
- Board Computer Products
- Other Electronic Components

Tokyo Electron Device Limited
inrevium™

Xilinx, Inc.

- Business Network & Security Solutions
- Storage Area Network Solutions
- Middleware/Software Solutions

F5 Networks, Inc.

Brocade Communications Systems, Inc.
