* Status of implementation of quarterly review procedures

This Summary of Consolidated Financial Results is outside the scope of external auditor's quarterly review procedures under the Financial Instruments and Exchange Act.

* Explanation of the appropriate use of financial forecast:

The financial forecasts and estimates in this Summary of Consolidated Financial Results are based on information available to the Company at the time of report issuance and certain assumptions judged to be reasonable by the Company, and therefore are not guarantees of future performance. Consequently, actual results may differ substantially from those described in this Summary of Consolidated Financial Results. Please refer to "1. Qualitative Information on Financial Results for the Current Quarter (4) Description of Financial Estimates Information such as Consolidated Financial Forecasts" on page 5.

The Company plans to hold an online conference for investors and analysts on November 10, 2022.

Supplementary materials to be used at the conference will be posted on the Company's website.

1. Qualitative Information on Financial Results for the Current Quarter

(1) Description of Operating Results

The global economy during the first half slowed as persistent inflation driven by raw material and energy cost increased due to heightened geopolitical risks, policy interest rate hikes and rapid exchange rate fluctuations, mainly in Europe and the United States, and the impact of the novel coronavirus infection on supply chains in some regions. The company continues to closely monitor and assess the impact of these global economic and geopolitical headwinds. Meanwhile, in the electronics industry, where the Tokyo Electron (TEL) Group operates, the semiconductor production equipment market is expected to grow in the medium to long-term as the importance of semiconductors is increasing against the backdrop of the transition to a data society accompanying the expansion of information and communication technology and efforts toward realizing a decarbonized society.

Under these circumstances, the consolidated financial results (cumulative) for the first half of the current fiscal year were net sales of 1,182,897 million yen (year-on-year growth of 26.9%), operating income of 350,165 million yen (year-on-year growth of 27.5%), ordinary income of 353,319 million yen (year-on-year growth of 27.2%), and net income attributable to owners of parent of 267,346 million yen (year-on-year growth of 33.5%).

The overview of each business segment is as described below.

(i) Semiconductor Production Equipment

Capital investment in semiconductors for logic/foundry has been made in a wide range of areas, from cutting-edge to mature generations of semiconductors, driven by the digitalization of society. Capital investment in DRAM has been revised in conjunction with inventory adjustments, but capital investment in NAND flash memory has remained at a high level due to increased multi-layering.

Consequently, net sales to external customers in this segment for the first half of the current fiscal year were 1,153,065 million yen (year-on-year growth of 27.3%).

(ii) Flat Panel Display (FPD) Production Equipment

As capital investment for large-sized LCD panels for televisions has run its course, the overall manufacturing equipment market for FPD TFT arrays has slowed. Meanwhile, capital investments in small and medium-sized OLED panels continue in conjunction with displays installed in end products being converted from LCD panels to OLED panels.

Consequently, net sales to external customers in this segment for the first half of the current fiscal year were 29,759 million yen (year-on-year growth of 11.5%).

(iii) Other

Net sales to external customers in this segment for the first half of the current fiscal year were 73 million yen (year-on-year growth of 7.3%).

(2) Description of Financial Conditions

Current assets at the end of the second quarter of the current fiscal year were 1,639,871 million yen, an increase of 231,168 million yen compared to the end of the previous fiscal year. This was mainly due to an increase of 180,415 million yen in cash and deposits, an increase of 79,138 million yen in inventories, an increase of 73,803 million yen in notes and accounts receivable - trade, and contract assets, a decrease of 66,999 million yen in short-term investments included in securities, and a decrease of 44,795 million yen in prepaid consumption tax.

Tangible fixed assets increased by 23,103 million yen from the end of the previous fiscal year, to 246,181 million yen. Intangible fixed assets increased by 3,817 million yen from the end of the previous fiscal year, to 26,357 million yen. Investments and other assets decreased by 14,473 million yen from the end of the previous fiscal year, to 225,662 million yen.

As a result, total assets increased by 243,616 million yen from the end of the previous fiscal year, to 2,138,073 million yen.

Current liabilities increased by 94,224 million yen from the end of the previous fiscal year, to 562,803 million yen. This was largely due to an increase of 85,795 million yen in customer advances, and a decrease of 15,263 million yen in income taxes payable.

Long-term liabilities increased by 4,248 million yen from the end of the previous fiscal year, to 83,077 million yen.

Net assets increased by 145,144 million yen from the end of the previous fiscal year, to 1,492,192 million yen. This was largely due to an increase of 267,346 million yen resulting from recording net income attributable to owners of parent and a decrease resulting from the payment of 118,833 million yen in year-end dividends for the previous fiscal year. As a result, the equity ratio was 69.2%.

(3) Description of Cash Flows

Cash and cash equivalents at the end of the second quarter of the current fiscal year increased by 118,955 million yen compared to the end of the previous fiscal year, to 454,603 million yen. The combined balance including 30,087 million yen in time deposits and short-term investments with maturities of more than three months that are not included in cash and cash equivalents was 484,690 million yen, an increase of 113,416 million yen from the end of the previous fiscal year. The overall situation regarding cash flows during the first half of the current fiscal year was as described below.

Cash flows from operating activities were positive 263,391 million yen, an increase of 57,476 million yen compared to the same period of the previous fiscal year. The major positive factors were 352,916 million yen in income before income taxes, and a 84,840 million yen increase in customer advances. The major negative factors were 109,303 million yen in payment of income taxes and a 69,215 million yen increase in inventories.

Cash flows from investing activities were negative 34,210 million yen compared to negative 25,785 million yen in the same period of the previous fiscal year. This was largely due to the payment of 32,792 million yen for the purchase of tangible fixed assets.

Cash flows from financing activities were negative 121,269 million yen compared to negative 66,190 million yen in the same period of the previous fiscal year. This was largely due to the payment of 118,833 million yen in dividends.

(4) Description of Financial Estimates Information such as Consolidated Financial Forecasts

Net sales for the first half of the current fiscal year have exceeded previous forecasts, with operating income, ordinary income, and net income attributable to owners of parent, each of which ultimately reach their all-time highs.

With respect to the future business environment, we see a trend among semiconductor manufacturers to postpone or restrain capital investments due to growing concerns about a macro-economic slowdown and geopolitical risks.

Under such circumstances, net sales are now expected to be lower than the previous forecasts, and we would like to amend the consolidated results forecasts for the full year announced on May 12, 2022, as follows.

Consolidated Operating Results (Cumulative) for the First Half of the Year Ending March 31, 2023

Notes:

*1. Percentages indicate changes from the same period of the previous fiscal year.

*2. Intersegment sales or transfers are eliminated.

Note: The financial forecasts and estimates stated in this Summary of Consolidated Financial Results are based on certain assumptions judged to be reasonable by the Company in light of information currently available concerning economic conditions in Japan and overseas, fluctuations in foreign exchange rates, and other factors that may have an impact on performance. The Company does not promise that the forecasts or estimates will be accurate.

They are therefore susceptible to the impact of many uncertainties, including market conditions, competition, the launching of new products (and their success or failure), and global conditions in the semiconductor related industry. Consequently, actual sales and profits may differ substantially from the projections described in this Summary of Consolidated Financial Results.

Notes

Going concern: None

Significant changes in Shareholders' Equity: None

Changes in significant subsidiaries during the period: None

Adoption of special accounting methods for preparation of quarterly financial statements: Yes

The Company and part of its consolidated subsidiaries calculate tax expenses by reasonably estimating the annual effective tax rate on income before income taxes after the application of tax effect accounting for the fiscal year, and applying this rate to income before income taxes for the current quarter under review.

Changes in accounting policies, changes in accounting estimates and restatements: None

Segment information**(i) General information about reportable segments**

A reportable segment is a component or an aggregated component of TEL Group. For each of the components, discrete financial information is available and the operating result is regularly reviewed by management to make decisions about resources to be allocated to the segment and assess its performance.

The operation of TEL Group consists of segments by products and services based on business units (BUs), and TEL Group identifies as a reportable segment, "semiconductor production equipment (SPE)" and "flat panel display (FPD) production equipment".

Products of the SPE segment consist of coater/developers, etch systems, deposition systems, cleaning systems used in wafer processing, wafer probers used in the wafer testing process and other semiconductor production equipment, such as wafer bonders/debonders.

The SPE segment principally develops, manufactures, and sells such products, and provides services related to them.

Products of the FPD production equipment segment consist of coater/developers, etch/ash systems used in the manufacture of flat panel displays and inkjet printing systems used in the manufacture of OLED displays. The FPD production equipment segment principally develops, manufactures, and sells such products, and provides services related to them.
